

The Event Attendance App using QR code will provide users with two platforms to login to app.

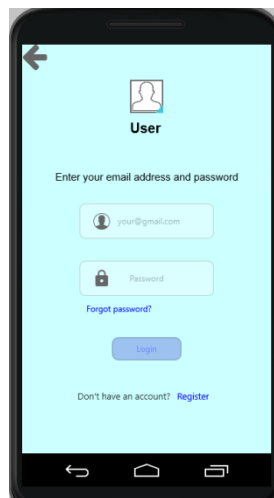

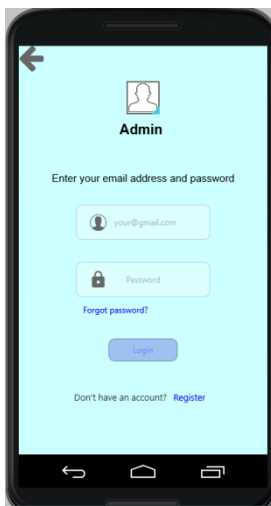

The user can login as admin if he or she has an even to be organizes, where the event requires participants.

The other one is user can login as user (Participant for the event) as shown image below.

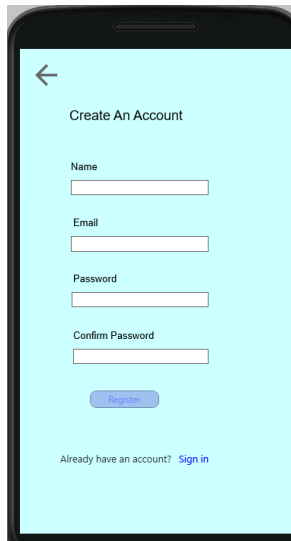

In here anyone can be admin if he or she has some event.

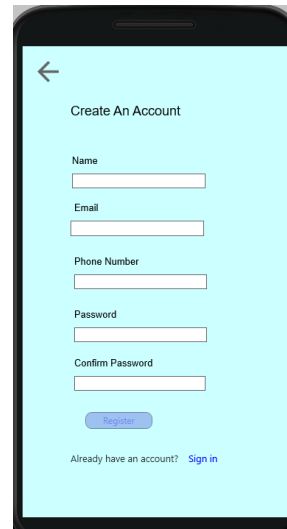

Then the login page for both admin and user will show respectively as show below.

If the both the user have account already they can login and if they don't have then they can sign up by clicking on register. Then the sign up page will display to fill the details of user.

A mobile app screen for creating an account. It features a light blue background and a black header with a back arrow. The title "Create An Account" is centered. Below it are four input fields: "Name", "Email", "Password", and "Confirm Password". A blue "Register" button is positioned below the "Confirm Password" field. At the bottom, there is a link "Already have an account? Sign in".

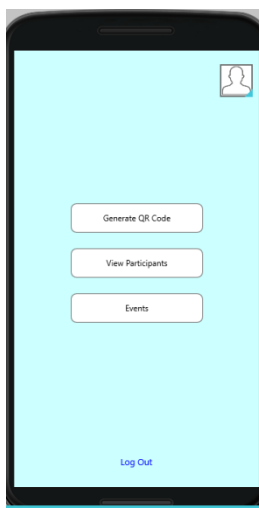

a. Sign up page for admin

A mobile app screen for creating an account, similar to the admin page but with an additional field. It features a light blue background and a black header with a back arrow. The title "Create An Account" is centered. Below it are five input fields: "Name", "Email", "Phone Number", "Password", and "Confirm Password". A blue "Register" button is positioned below the "Confirm Password" field. At the bottom, there is a link "Already have an account? Sign in".

b. Sign up page for user

In the user part the phone number is require so that while scanning their phone number is required.

Admin can generate QR code and view participant of the event and can manage the event. They can even download QR code and print for the user to scan.

A mobile app screen for an admin user. It features a light blue background and a black header with a back arrow and a profile icon. The title "Admin Dashboard" is centered. Below it are three buttons: "Generate QR Code", "View Participants", and "Events". A blue "Log Out" link is at the bottom.A mobile app screen for downloading a QR code. It features a light blue background and a black header with a back arrow and a profile icon. The title "Download QR Code" is centered. Below it is a large QR code and a blue "Download" button. A blue "Log Out" link is at the bottom.

User can only scan the QR code provider by the admin or organizer to show that they present in the event.
